SUMMARY

Junior full stack developer focused on Java backend development and advanced student of the University Technical Degree in Software Application Development (TUDAI, UNICEN). I build REST APIs with Java 17, Spring Boot, Spring Data JPA and PostgreSQL, and web applications with Angular and TypeScript. I built an end-to-end marketplace with Mercado Pago payment integration and an AI-powered automation with n8n (OpenAI API). Looking for my first professional role as a backend or full stack developer. Available immediately, full-time or part-time; remote (Argentina or international), hybrid or on-site in Tandil.

SKILLS

Languages: Java 17, JavaScript, TypeScript, SQL, PHP
Backend: Spring Boot, Spring Data JPA, Hibernate, Maven, REST APIs (RESTful), DTOs and validation, Node.js, Express
Frontend: Angular (Signals, SSR), React (basic), HTML5, CSS3, SCSS (Sass), Bootstrap
Databases: PostgreSQL, MySQL, Firebase, relational data modeling, UML
Integrations: REST API integration, Webhooks, n8n, Mercado Pago, Cloudinary, OpenAI
Tools: Git, GitHub, Docker, Postman, Swagger, JUnit (basic), IntelliJ IDEA, Visual Studio Code
Concepts and methodologies: Object-oriented programming (OOP), MVC pattern, role-based authentication and authorization, Agile (Scrum, Kanban)
Soft skills: Communication, teamwork, continuous learning, problem solving

PROJECTS

TiketYa · Ticketing REST API · Team academic project | Oct 2026 – present
Java 17, Spring Boot, Spring Data JPA, PostgreSQL, Maven, Docker, Swagger, Angular
Web Architecture course (TUDAI). Public repository once the milestone is delivered.

- Team development of a Spring Boot REST API for selling and managing event tickets.
- Responsible for designing the relational data model in PostgreSQL.
- Angular frontend integrated with the API.

Anverso · Online art marketplace · Personal project | 2026
Angular, TypeScript, Angular SSR, Firebase, Mercado Pago, Cloudinary
Site: santicarrillo.github.io/Pagina-Obras · Code: github.com/santicarrillo/Pagina-Obras

- End-to-end platform where artists create a profile, publish and sell their artwork. Live and used by its first real user.
- Mercado Pago payment integration: each sale is credited directly to the artist's account.
- Three roles (visitor, buyer and artist) with routes protected by authentication and authorization guards.
- Automated emails, shipment tracking, image hosting on Cloudinary and server-side rendering (SSR).

Job search automation with n8n and AI · Personal project | 2026
n8n, OpenAI API, Gmail, Google Sheets, Google Drive, Webhooks

- Scheduled workflow that runs daily: reads LinkedIn job alerts from Gmail and uses AI to compare each offer against my resume.
- Emails the relevant offers and logs them in Google Sheets, saving me 1 to 3 hours of manual job searching.

Precio Justo · Landing page with pricing calculator · Personal project
JavaScript, HTML5, CSS3, MVC
Site: santicarrillo.github.io/lading-page-pole

- Calculator that suggests a selling price based on cost, fees, margin and inflation; framework-free JavaScript, MVC pattern and input validation.

Other projects: Admin Seguros (prototype with React, Node.js and Express; API organized in routes, controllers and models) · Video Game Catalog (Angular, TypeScript, Signals; consumes a public REST API).

EDUCATION

University Technical Degree in Software Application Development (TUDAI)
Universidad Nacional del Centro de la Provincia de Buenos Aires (UNICEN), Tandil, Argentina | Mar 2023 – present
Advanced student, taking final courses. Expected graduation: mid-2027.

LANGUAGES

Spanish: native · **English:** intermediate (B1–B2)
